

# 27" Direct View Multimedia HDTV Monitor **C27V28**

▶ **27" Flat, High Definition, Fine Pitch Picture Tube**

Offers the highest resolution capability possible for viewing of HD content material in 1080i, 480p, or 600p SVGA formats. Fine pitch picture tube with Invar mask provides the sharpest and clearest picture possible.

▶ **3D Y/C Comb Filter**

Combines the adaptive digital processing of a 3-line digital comb filter with 3-D motion detection. Eliminates hanging dots and color noise on stationary images. Reduces "dot crawl" and overall picture noise.

▶ **2-Tuner PIP (Picture in Picture)**

Watch a second channel in the PIP inset screen while watching the main channel on the full screen without having to use any outside tuner source, such as a VCR, etc.

▶ **16:9/4:3 Aspect Ratio Correction**

Allows users to view feature length movies in their original wide screen format (16:9) or in regular TV format (4:3).

▶ **Scan Velocity Modulation**

Dynamically varies the scanning speed of the electron beam to create clear, well defined images for the sharpest picture possible.

▶ **Dynamic Focus**

Ensures accurate side-to-side focus. Red, green, and blue color beams are accurately aligned in the center of the screen.

**DIGITIZE THE EXPERIENCE.™**

# 27" Direct View Multimedia HDTV Monitor C27V28

**Color Temperature Control** Using the remote control, users can select between "warm" or "cool" presets to control the ambiance and mood of the picture on the screen.

**SEQ™ Front Surround Sound** Electronically expands the sound listening field, making the stereo audio seem even more separated. Audio is more spacious and three dimensional with increased clarity at any listening level. SEQ™ simulates the surround experience by adding dramatic impact to stereo programs without the use of additional surround sound speakers.

**Gemstar Guide+ Gold™** Premium electronic program guide that uses an easy-to-read grid guide system for channel navigation. On-screen display has full color channel logos, station call letters, 3D graphics, horizontal scrolling, direct tuning access through the grid, and theme color-coding.

**MTS Stereo with SAP** Multi-Channel Television Sound, or MTS, produces crisp, clear stereo broadcasts. Second Audio Programming, or SAP, is a separate audio signal that allows networks to broadcast audio in different languages.

**Parental Control with V-Chip** Programmable feature that uses the US standard content advisory system to exclude viewing of specific programs or program types.

**Jack Pack**

RF Input	1
Hi-Res Component Video In (Y, P <sub>B</sub> , P <sub>R</sub> )	2 Rear
RGB In (SVGA, VGA modes)	.1 Front, 1 Rear
S-Video In	1 Front, 2 Rear
A/V In	1 Front, 2 Rear
A/V Out	1 Rear
